Pesticidial crystal protein crylBc (Insecticidal delta-endotoxin
Pesticidial crystaline entomocidal protoxin) (140 kDa crystal protein).
Name=crylBc; Synonyms=crylB(c), crylBc;
Bacillus thuringiensis (subsp. morrisoni).

Cryli(b)) (Crystaline entomocidal protoxin) (81 kDa crystal protein)
Names-ryll(b), Synoxyms=cryll(b), cryv, cryv465;
Bacillus thuringiensis (subsp. entomocidus).
Bacteria; Firmicutes; Bacillales; Bacillaceae; Bacillus.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Appl. Environ. Microbiol. 61:2402-2407(1995).

-I- FUNCTION: Promotes colloidosmotic lysis by binding to the midgut
epithelial cells of certain coleopteran and lepidopteran species.
Active on Plutella xylostella but not on Bombyx mori.

-!- DEVELOPMENTAL STAGE: The crystal protein is produced during sporulation and is accumulated both as an inclusion and as part o
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              the spore coat.

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

Datasporal crystal protein cry9Cal (validated) - Bacillus thuringiensis
N;Alternate names: parasporal crystal protein cryIH
C;Species: Bacillus thuringiensis
C;Date: 01-Dec-2000 #sequence_revision 01-Dec-2000 #text_change 09-Jul-2004
C;Accession: A59350; S49247
R;Lambert, B.; Buysse, L.; Decock, C.; Jansens, S.; Piens, C.; Saey, B.; Seurinck, J.; Vc
Appl. Environ. Microbiol. 62, 80-86, 1996
A;Title: A Bacillus thuringiansis insecticidal crystal protein with a high activity again
A;Reference number: A59350, MUID:96141404; PMID:8572715
A;Reference number: A59350
A;Wolecule type: DAA
A;Residues: 1-1157 cLAA>
A;Residues: 1-1157 cLAA>
A;Residues: 1-1157 cLAA>
A;Residues: Comment: This parasporal crystal protein, active against corn borer and other insects, C;Superfamily: parasporal crystal protein
C;Superfamily: parasporal crystal protein
C;Superfamily: delta-endotoxin
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                470

parasporal crystal protein - Bacillus thuringiensis (strain aizawai)
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Accession: A26513
R;Ceda, K.; Oshie, K.; Shimizu, M.; Nakamura, K.; Yamamoto, H.; Nakayama, I.; Ohkawa, H.
R;Ceda, K.; Oshie, K.; Shimizu, M.; Nakamura, K.; Yamamoto, H.; Nakayama, I.; Ohkawa, H.
A;Title: Nucleotide sequence of the insecticidal protein gene of Bacillus thuringiensis s
A;Accession: A26513
A;Accession: A26513
A;Accession: A26513
A;Accession: A26513
A;Besidues: 1-1155 coBp.
A;Residues: 1-1155 coBp.
C;Supertamily: parasporal crystal protein
C;Superfamily: parasporal crystal protein
C;Keywords: delta-endotoxin
                                                                                                                                                                                                                                                                                                                                                                                                                                                            12;

parasporal crystal protein crylAb3 - Bacillus thuringiensis
N;Alternate names: delta-endotoxin-2; entomocidal protoxin; entomocpathogenic crystal prot
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Species: Bacillus thuringiensis
C;Accession: A90025; A91560; A90955; A26461; A24172; A29043; JD0002

A29125
A29125
Barasporal crystal protein Bt2 - Bacillus thuringiensis subsp. kurstaki (strain HD-1)
C;Species: Bacillus thuringiensis subsp. kurstaki
C;Date: 15-Dec-1988 #sequence_revision 15-Dec-1988 #text_change 09-Jul-2004
C;Accession: A29125
B;Fischhoff, D.A.; Bowdish, K.S.; Perlak, F.J.; Marrone, P.G.; McCormick, S.M.; Niederme Bio/Technology 5, 807-813, 1987
A;Title: Insect tolerant transgenic tomato plants.
A;Reference number: A29125
A;Status: not compared with conceptual translation
A;Molecule type: DNA
